## NPS UPDATE

Yesterday morning, a meeting was held between our Health and Safety committee representatives and Securitas management concerning the chairs at the NPS position.

- -The decision to remove the chairs came from CATSA following a complaint made in another airport about their lack of chairs while other airports had some. CATSA decided to level the field by removing them everywhere;
- -During the meeting, STAS expressed its opposition to the removal of the chair and STAS' HR Vice-President, Catalin Caracas, offered his excuses about the way the removal was done;
- -A study committee was put in place to prepare an investigation and report relating to the health and safety and the ergonomics of the NPS position;
- -A Health and Safety representative, a representative from STAS and a CATSA representative will jointly investigate the NPS position in the next few days in order to prepare the joint report and changes to be made;;
- -On April 15th, a Health and Safety representative from CATSA, Sunny Carier, will be in Montreal to meet with the joint committee concerning the NPS chairs. During that meeting, the report will be handed to him and CATSA will then submit its decision in the following days.
